

# TIP SHEET

## Measure Statuses

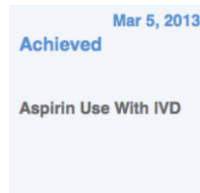

### Definitions

**Measure Status** is displayed on each individual measure's Grid or Row (depending on the view you selected). The following are available measure statuses:

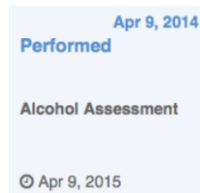

- **Excluded Measure:** The last performed date is displayed in the upper-right corner.

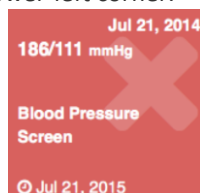

- **Met Measure (due date not defined):** The measure is displayed as *Achieved*, and the last performed date is displayed in the upper-right corner. The due date is *not* displayed because it was not defined or found.

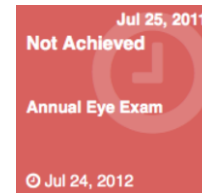

- **Met Measure (due date in the future):** The measure is displayed as *Performed*, and the last performed date is displayed in the upper-right corner. The due date is displayed in the lower-left corner.

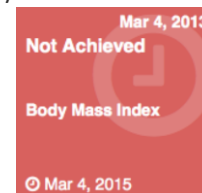

- **Not Met Measure (due date in the future):** The measure displays the result value, and the last performed date is displayed in the upper-right corner. The due date is displayed in the lower-left corner.

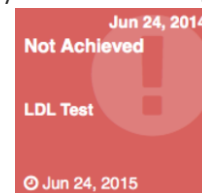

- **Not Met Measure (due date has passed):** The measure is displayed as *Not Achieved*, and the last performed date is displayed in the upper-right corner. The due date is displayed in the lower-left corner.

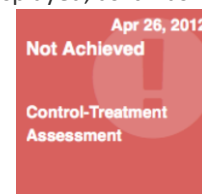

- **Not Met Measure (due date is within 30 days):** The measure is displayed as *Not Achieved*, and the last performed date is displayed in the upper-right corner. The due date is displayed in the lower-left corner.

- **Not Met Measure (missing data, due date in the future):** The measure is displayed as *Not Achieved*, and the last performed date is displayed in the upper-right corner. The due date is displayed in the lower-right corner.

- **Not Met Measure (missing data, due date not defined):** The measure is displayed as *Not Achieved*, and the last performed date is displayed in the upper-right corner. The due date is *not* displayed, as it was not defined or found.

- **Not Met Measure (missing data, due date and last performed date not defined):** The measure status and the upper-right corner (where the last performed date is usually displayed) is displayed as a dash (--). The due date is *not* displayed, as it was not defined or found.
