

*'Delivering High Quality Care One Patient at a Time'*

## 2019 Survey Remains Open—Please Respond!

We value your partnership as a member of IHP and continuously seek feedback on how we can build additional benefits into your membership. Two themes have emerged in discussions with physicians members as areas for which we would like to gauge collective interest: medical malpractice coverage and health insurance benefits.

A Survey Monkey has been circulated which is designed to help us determine whether pursuit of these offerings would be worth further exploration. The response rate has been low therefore we have left the survey open in hopes of receiving additional feedback. Please take the time to respond, we want to hear from you!

## Horizon Shared Savings Program Updates

### 2019 Physician Distribution Formula

The IHP Finance Committee has proposed a distribution formula for 2019 for the Horizon Alliance Shared Savings Program that has been approved by the Board. Components are as follows:

- Eligible funds will be prorated to primary care practices based on attributed lives
- Measure performance will condition payments to practices, with any dollars not earned used for future distribution pools
  - Quality measures condition 60% of the payment
  - Citizenship measures condition 20% of the payment
  - Utilization measures condition 20% of the payment

Details around measures in each category can be found on the website in addition to an illustrative example of payment calculations for two practice scenarios.

### Quality Metrics—Cervical Cancer Screening

Cervical Cancer Screening has been added as a new metric in the adult program for 2019 as part of a mandatory screening bundle. All quality metrics and percentiles for 2019 can be found on the website.

Inclusions	Women between the ages of 21—64
Exclusions	1) Hospice services in 2019; 2) Total hysterectomy
Criteria for Satisfaction	1) Women 21—64 years of age who had cervical cytology performed every 3 years; 2) Women 30—64 years of age who had cervical cytology / human papillomavirus (HPV) co-testing performed every 5 years

### Care Management Report

Have you taken a look at your practice's Care Management report on the MFT site? This report identifies patients attributed to your practice who have a high risk score and may require your attention for proactive intervention and care coordination. The report is located in your Horizon to Partner, Care Management folder. The IHP website contains a glossary and user guide explaining how to navigate the report and can be located in the newly created 'Reference Materials' section. Please note that several helpful documents have been posted here for your convenience.
